Indoors with rubber-tipped implement

FABEN Stuart *	GBR	76.66		75	03/03/96	3	Kajaani
----------------	-----	-------	--	----	----------	---	---------

**** The idea of putting together the results achieved with the Old Javelin (until 31/12/85) with those achieved with the New Javelin (beginning 01/01/1986) belongs to Dr. Karl Graf, an Austrian statistician and member of the ATFS, with whom I collaborated on this project.**

After consulting with a number of trainers as well as with several statistician colleagues of his, Dr. Graf came up with the following formula: $OJ \times 0.85 \times 1.78 = NJ$.

For example, take Uwe HOHN's record of 104.80 m with the old javelin. On your calculator, you can calculate his probable distance with the new javelin:

$(104.8 \times 0.85) \times 1.78 = 92.83$.

Though it is not possible to establish a definitive hierarchy of competitors using the old javelin along with those using the new one, I believe this system allows for good comparisons of all existing results achieved with the javelin.

**** L'idée de comparer les résultats réalisés avec l'ancien javelot (jusqu'au 31/12/85) avec ceux réalisés avec le nouveau javelot (à partir du 01/01/1986) appartient au Dr. Karl Graf, un statisticien autrichien et membre de l'ATFS, avec lequel j'ai collaboré sur ce projet.**

Après avoir consulté un certain nombre d'entraîneurs et plusieurs de ses collègues statisticiens, le Dr. Graf a proposé la formule suivante : $OJ \times 0.85 \times 1.78 = NJ$.

Par exemple, prenons la performance d'Uwe HOHN à 104.80m, réalisée avec le vieux javelot. Sur votre calculatrice, vous pouvez chiffrer sa distance probable avec le nouveau javelot :

$(104.8 \times 0.85) \times 1.78 = 92.83$.

Bien qu'il ne soit pas possible d'établir une hiérarchie définitive entre les concurrents ayant lancés avec l'ancien javelot et ceux d'aujourd'hui, je crois que ce système réussit à établir la meilleure comparaison possible entre ces deux générations de lanceurs.
