** The idea of putting together the results achieved with the Old Javelin (until 31/12/85) with those achieved with the New Javelin (beginning 01/01/1986) belongs to Dr. Karl Graf, an Austrian statistician and member of the ATFS, with whom I collaborated on this project.

After consulting with a number of trainers as well as with several statistician colleagues of his, Dr. Graf came up with the following formula: $OJ0.85 \times 1.78 = NJ$.

For example, take Uwe HOHN's record of 104.80 m with the old javelin. On your calculator, you can calculate his probable distance with the new javelin:

$$(104.8 \times 0.85) \times 1.78 = 92.83.$$

Though it is not possible to establish a definitive hierarchy of competitors using the old javelin along with those using the new one, I believe this system allows for good comparisons of all existing results achieved with the javelin.

** L'idée de comparer les résultats réalisés avec l'ancien javelot (jusqu'au 31/12/85) avec ceux réalisés avec le nouveau javelot (à partir du 01/01/1986) appartient au Dr. Karl Graf, un statisticien autrichien et membre de l'ATFS, avec lequel j'ai collaboré sur ce projet.

Après avoir consulté un certain nombre d'entraîneurs et plusieurs de ses collègues statisticiens, le Dr. Graf a proposé la formule suivante : $OJ0.85 \times 1.78 = NJ$.

Par exemple, prenons la performance d'Uwe HOHN à 104.80m, réalisée avec le vieux javelot. Sur votre calculatrice, vous pouvez chiffrer sa distance probable avec le nouveau javelot :

$$(104.8 \times 0.85) \times 1.78 = 92.83.$$

Bien qu'il ne soit pas possible d'établir une hiérarchie définitive entre les concurrents ayant lancés avec l'ancien javelot et ceux d'aujourd'hui, je crois que ce système réussit à établir la meilleure comparaison possible entre ces deux générations de lanceurs.
